

Michael F. Pruyn

2nd Vice President, IT Strategic Services and Development

Mike graduated with a Masters Degree in Computer Science from Baruch College in New York City while working for Shearson American Express . While at Shearson, Mike was responsible for a large part of the back office processing, including all margin account and American Express Gold Card transaction processing.

Mike joined UNUM in 1986 as a systems analyst in the Individual Life division, responsible for systems support in the Finance and Actuarial department. He held this position for two years before moving to Corporate Research and Technology. While in this position, he helped build the Long Term Disability Underwriters Assistant system. This is a knowledge based system that an underwriter uses when renewing a Long Term Disability case.

In 1992 Mike joined the Long Term Disability Division and assisted in the construction of their new claims system. This was a cross platform, client server system. He had a wide range of responsibilities on this project including business analysis and design, physical program design, logical and physical database design, program construction, and management of the entire construction effort.

Mike joined Smith Group in May of 1995 to assist in all Technology and Systems Development.

In 2002 Mike let Smith Group to pursue other opportunities, but rejoined Smith Group in 2007. His broad range of new experience expands and enhances Smith Group's client service offering.
